Goaltending requires a special kind of player – known for being the position that requires bravery and a willingness to have pucks chucked at your face all in the name of hockey...and enjoys it, **Goalie VR** puts you between the pipes with up to 5 of your so-called friends using the Goalie VR Mobile app slamming 100 MPH shots straight at you. Using the HTC VIVE or Oculus Rift, players will don the mask

and suit up to save each shot with every inch of their body. Select from Amateur, Semi-Pro or Pro difficulty levels, set lefty or righty controls, customize plays by setting up shooters around the offensive zone, play timed and goal-driven matches, earn achievements, even study replays and heat-maps to discover your strong and weak points. HTC VIVE Tracker support amplifies the physicality and reality of the experience. Fully 3D graphic effects and surround sound add depth and energy and fuel the pressure of facing off with your opponents.

Goalie VR is available now on Steam (<http://bit.ly/2fKMazK>) for HTC Vive and Oculus Rift (<http://ocul.us/2koYDhF>) in North America and Europe.
